

REC TC Meeting Minutes

August 25, 2022

Attendance:

- Karl Hammar (chair)
- Erik Wallin
- Per Karlberg
- Peter Hartlev

Absent

- Joakim Eriksson

Housekeeping

1. Main branch protection
 - a. Merge requirements
 - i. DECISION: One review by TC member required
 - b. Override conditions, to formalize or not?
 - i. DECISION: Override allowed for bugfixes, branches must be named with the "fix-" prefix.
2. REC4 repo release structure
 - a. Suggestion: REC4 => REC, w/ legacy branch for REC 3.3
 - b. DECISION:
 - i. Add REC4 to current repo as one monolithic commit
 - ii. Keep REC3.3 and earlier as releases (i.e., Git tags) in repo
 - iii. Maintenance updates to REC3.3 or earlier happen in maintenance branches based on those tags
3. Triaging issues list in [REC \(3.3\)](#) repo
 - a. Responsibility?
 - b. Timeline?
 - c. DECISION: Each TC member triages five issues by next REC TC meeting (October 03). First come, first served.
4. New developer site demo
 - a. ...

Open issues

- <https://github.com/RealEstateCore/rec/issues/48> – Outdoor spaces
 - o DECISION: Create OutdoorSpace as subclass of Architecture. Do not define any subclasses of OutdoorSpace (initially) since most possible such spaces (Playground, Garden, etc) could exist indoor also.
- ParkingSlotHot/Cold as Room or as Zone?
 - o DECISION: Parking slots to be moved to subclasses of Zone.

- DECISION: Remove ParkingSlotCold / Hot (temperature depends on placement of the parking slot, not of typing).
 - DECISION: Zone to be relaxed to not require being indoor.
- Tenant Unit / Premises class
 - DECISION: Decision outstanding. To be followed up per email.

Open pull requests

- ~~<https://github.com/RealEstateCore/REC4/pull/9>~~ ~~Asset.mountedTo~~
- ~~<https://github.com/RealEstateCore/REC4/pull/10>~~ ~~Architectural assets from REC3~~
- <https://github.com/RealEstateCore/REC4/pull/7> – REST API
 - DECISION: OK to release REC4 without actuation primitives in REST API
 - DECISION: JSON-LD compliance is important. We need to try and remain compliant w/ JSON-LD for GA, but the public preview release might not be 100 % compliant.
 - Future work: define REC-specific context at W3ID or dev.realestatecore.io
- ~~<https://github.com/RealEstateCore/REC4/pull/13>~~ ~~Markdown docs~~
